MST300 MINI | Strip packaging machine

Automatic machine for packaging solid products in strips. This compact machine fills, seals and cuts the strip and is a stand-alone application. Thanks indeed to its compactness and to the easy disassembly of the single units using just a few tools, it is an ergonomic, flexible and versatile machine.

- Machine made of AISI 304S steel, with structural parts in nickel-plated FE and anodized aluminium.
- Full balcony structure, compliant with GMP standards.
- Drive separate from functional modules.
- Parts in contact with the product made of FDA approved material.
- Maximum accessibility to operational area.
- Possibility to install feeders for tablets, effervescent tablets, capsules and coated tablets using heat-seal film.
- Tablet feeding system with vibrating plate.

- Monobloc forming station (for specific size), disassembled using a special forklift supplied with the machine.
- 2 reel holders with end-of-reel sensors.
- Film unwinding unit managed by an ultrasound system.
- Film drive and vertical cutting unit controlled by clutches.
- Product presence control.
- Reject unit: flap for rejecting empty strips and/or incomplete strips into a dedicated bin.
- Mechanical cutting speed: up to 100 horizontal cuts per minute.
- Production rate: to be calculated based on the type of product and material used.
